

## ARM Socrates CoreLink CMN-600 Creation

### Summary:

The course introduces the Socrates IP Tooling family and provides detailed material how to design CoreLink CMN-600 interconnect. The training contains labs that help the audience to ramp up on the tool faster.

### Prerequisites:

- Familiarity with CoreLink CMN-600 interconnect
- Familiarity with ARM technology

### Audience:

Hardware design engineers who need to build CoreLink CMN-600 interconnect and embed it into their design.

### Length:

1 day onsite classroom (inc Lab) or ½ day WebEx (no Lab)

### Modules:

1. Overview
2. CMN-600 Design Flow
3. Demo session showing the particular design flow including the main tool features and capabilities
4. Lab session where each attendee works individually with the tool by completing the provided workbook with our assistance when necessary
